Field notes: study-room observations (page 1)

Observations were made on three weekday afternoons in two rooms with different noise rules.

In the quiet room most visitors stayed for more than an hour. In the shared room visits were shorter and more p

Power sockets were the most common reason given for choosing a seat.

Field notes: study-room observations (page 2)

Observations were made on three weekday afternoons in two rooms with different noise rules.

In the quiet room most visitors stayed for more than an hour. In the shared room visits were shorter and more p

Power sockets were the most common reason given for choosing a seat.

Field notes: study-room observations (page 3)

Observations were made on three weekday afternoons in two rooms with different noise rules.

In the quiet room most visitors stayed for more than an hour. In the shared room visits were shorter and more p

Power sockets were the most common reason given for choosing a seat.
